INFORMATION MANAGEMENT GROUP

INFORMATION MANAGEMENT GROUP

What makes IMG the centre of excellence in internet and information management solutions?

People

IMG recognises the importance of recruiting the best people. Our strength and reputation are built on our highly focused team's strong experience of Internet and information management technologies, understanding of business processes, first-rate communication skills and dedication to perfection. All of our consultants are highly qualified with extensive skills in the latest methods, Internet and database technologies and have years of experience in delivering complex applications across industries. This provides us with unrivalled insight into the technology issues facing our customers and the means by which we can help to resolve them.

Technology

We invest significant time in evaluating and applying the latest Internet and information management software and in developing our own. Through the integration of standard and established technologies and innovative IMG software components we are able to offer accelerated delivery of business solutions, enabling our clients to achieve business returns in the shortest possible time.

Innovation

Working closely with our customers, our services portfolio is constantly being updated as we strive to satisfy new business needs. Our continuous innovation programme has led to the development of a range of Internet environments and solutions that enable our clients to streamline their internal business processes and interact with their customers and suppliers.

Integration

The field of information management and the Internet today goes well beyond corporate boundaries and packaged software. It requires a thorough understanding of technologies, infrastructures, processes and people to provide flexible and adaptable business and business-to-business solutions that deliver real business benefits. At IMG we have extensive experience with implementing and integrating e-commerce, corporate intranets, extranets and web-based information systems with line of business applications.

Partnership

We strongly believe in working in partnership with our clients and in proactively helping them to achieve high returns in their technology investments in the shortest possible time. Our track record in delivering complex projects on time and budget is second to none.

Professionalism

We strive to achieve the highest standards of professionalism in everything we do – from presentations and proposals, to design and development, to project management and customer service.

Information Management Group helps organisations use the internet and advanced information management technologies to enhance their business processes and achieve strategic advantage.

At IMG our approach is based on one consistent, guiding principle – to ensure that our customers achieve success through the use of our products and services.

Information Management Group provides products and services to organisations looking to enhance their business processes through the application of advanced internet, e-commerce and business intelligence technology. All of our consultants, consulting partners and associates combine extensive business process knowledge with hands-on technical experience and first rate communications skills to deliver successful business solutions first time, every time.

What Products and Services do we offer?

From defining business requirements to the design of technical architectures, application development and training, our consultants offer exceptional business process knowledge and extensive practical experience in the implementation of Internet and management information systems.

We offer services in all critical phases of a project:
